Dear Rotary Leaders,

Polio Eradication- Rotary's No. 1 priority

Greetings.

Polio has been conquered in many countries of the world and contained in many others; still our work is incomplete because Polio has not been eradicated globally. As a result children around the world are at risk, both in Polio-free and Polio endemic countries.

Perhaps, Rotarians are continuing their efforts eradication. Perhaps, engrossed serving their fields that Polio has important. But today let me we revive our flagging ourselves in this direction.

At the recently held Angeles, Polio eradication was stressed and represent were of the same No. 1 and we must completely.

fatigued and a little tired of towards complete Rotary Clubs are so communities through other become a little less remind you, it is high time interest and reinvent

Rotary's Convention in Los as our top-most priority stressed and all the leaders opinion- Polio is our enemy eradicate this scourge

India is one of the countries that are still struggling to end Polio. Extra attention and resources must be devoted to fight this menace in the country. Immunization through Polio vaccine is the strongest weapon we possess and Rotary must and will have to use this weapon effectively. All Rotary Clubs in the country must renew and strengthen the efforts for immunization and most importantly ensure that all eligible children are immunized. This little effort from all of us will ensure the death of Polio in India.

India is facing a decisive moment today. We are on the verge of making history by achieving the biggest Public Health victory of our times and each Rotary district needs to contribute towards making this a reality. Even if one district fails, we will miss this opportunity of giving a life of Polio-free experience to our children.

You are the leaders who can motivate, mobilize, educate and inspire Rotarians to make this happen for Rotary, for India and its children. The India National PolioPlus Committee is always there to help you, to guide you and to assist you in your efforts. Let us re-dedicate ourselves to the project of Polio eradication. Therein lies our dream of a Polio free world.

Let us make this Dream Real.

Regards,

ASHOK MAHAJAN
DIRECTOR ROTARY INTERNATIONAL
